

6520TH TEST GROUP
AWARDS DAY

AWARD RECIPIENTS
FOR CALENDAR YEAR 1982

DEPARTMENT OF THE AIR FORCE
HEADQUARTERS, 6520TH TEST GROUP (AFSC)
EDWARDS AIR FORCE BASE, CALIFORNIA 93523

TO ALL MEMBERS OF THE 6520TH TEST GROUP:

It's been our sincere privilege again this year to lead an organization of exceptionally bright, energetic people who believe in progress. The contents of this brochure prove that claim very adequately. Other individual and groupwise achievements amplify your dedication and quality. We commend your successes.

The year 1982 was, in large measure, a formative year with actual test workload trailing off as we geared up to get ready for many coming new starts. Several major test support systems were placed on contract and our primary operations and maintenance range service was contracted to set the stage for the next five years. We've recruited some of the finest new talent we've seen in several years and planning for new test programs has been progressing well. Cooperation with other base agencies and our support to customers have never been better. We're pleased with the progress made last year. We see a correct sense of urgency, a commitment and confidence in the Group. We believe it will not only sustain us in the future, but insure the balanced excellence we strive for.

The next couple of years promise an unprecedented workload at the Center. It will be a real challenge for all of us. We're excited about that future and we know that you are too. But with so much more to do without substantial resource enrichment, we are going to need more efficiency, innovations, and better discipline. In other words, we need to "Test Smarter." That theme must be in the front of our minds as we approach every task. If we do that and maintain the "can do" spirit so typical of the 6520th Test Group, 1983 should be a real banner year.
